Abdur Rahman

Full Stack Developer

✉ ab.rahmansiyam@gmail.com ☎ 01882799557 ⚲ Uttara, Dhaka

INTRO

I am a Full Stack Developer with almost **1 year of hands-on experience**, specializing in building efficient, secure, and scalable web applications. Skilled in **Python, React.js, Node.js, and Express.js**, with practical expertise across both **frontend and backend** technologies, including experience in **RESTful API** development, and integration to ensure smooth data exchange and optimized performance.

Portfolio link: *https://siyamar.github.io/Abr-Portfolio*

CORE SKILLS:-

Backend	:	Python, Django, Node.js, Express.js, web2py
Frontend	:	React.js, Javascript, HTML5, CSS3, XML
Databases	:	MySQl, PostgreSQL, MongoDB
Frontend Tools	:	Bootstrap, Tailwind CSS, Redux
Tools & Framework	:	Npm, Git, VS Code, Code Blocks, Packet Tracer, Firebase
Version Control	:	GitHub
Operating System	:	Windows

WORK EXPERIENCE

Eon System

Jan 2025 - Present

● *Python Developer*

I've worked on a variety of projects using **Python** Web2py technology, contributing to initiatives for organizations such as **Hamdard, Marico, and SC Johnson**. My focus has been on developing efficient, secure, and scalable web applications that align with each client's specific goals and business requirements.

EDUCATION

World University of Bangladesh, Dhaka

Jan 2021 - March 2025

● *Computer Science and Engineering*

- - Bachelor of science

Munshirhat College, Matlab-south

May 2017 - April 2019

● *Higher Secondary Certificate*

- - Science

PROJECTS

Restaurant Management

Designed and implemented a dynamic Restaurant

System
2023 - 2024

Management System with user authentication, order customization, and seamless payment features. Admin functionalities include menu updates and a dashboard for profit/loss analysis through pie charts.

Technology Used: React, Node.js Express, Mongo DB, React Router, Vite, Tailwind CSS, DaisyUI, Firebase, Axios, React Hook Form, etc.

GitHub link client: *https://github.com/siyamar/Restaurant-Boss-Client*
GitHub link server: *https://github.com/siyamar/Restaurant-Boss-Server*

Keto Journey
2023 - 2023

Developed "Keto Journey" with user authentication, blog creation, and commenting features. Users enjoy a responsive and visually appealing home page showcasing recent posts, an About Us section, News list, and Gallery. Privacy controls restrict blog creators from commenting but allow updates and many more features.

Technology Used: React, Node.js, Express, Mongo DB, Tailwind CSS, DaisyUI, Firebase, Axios, React Hook Form, etc.

GitHub link server: *https://github.com/siyamar/Keto-Diet-Server*

Dashboard
2023 - NOW

This project is a comprehensive web-based Dashboard application built with Next.js, designed to manage orders and users efficiently. The Dashboard offers a centralized view of key data using intuitive bar and pie charts for visual insights. Users can add new orders, view detailed order information, and manage user accounts. Additionally, the application includes features for creating new users, logging in and out securely, and ensuring proper authentication. The clean and responsive design ensures an optimal user experience across various devices.

Technology Used: Next.js, Node, Express, Mongo DB, Tailwind CSS, MUI, DaisyUI, Firebase, Axios, React Hook Form, etc.

GitHub link server: *https://github.com/siyamar/dashboard-server*

News Portal
2023 - 2024

It is a news website where there are many categories of news and among them the most recent will be first and clicking on one will show its details.

Technology Used: Next.js, Express, Mongo DB, Tailwind CSS, DaisyUI, Firebase, Axios, React Hook Form, etc.
